**Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm. It exists within the Tron blockchain , one of the TOP cryptographic currency.**

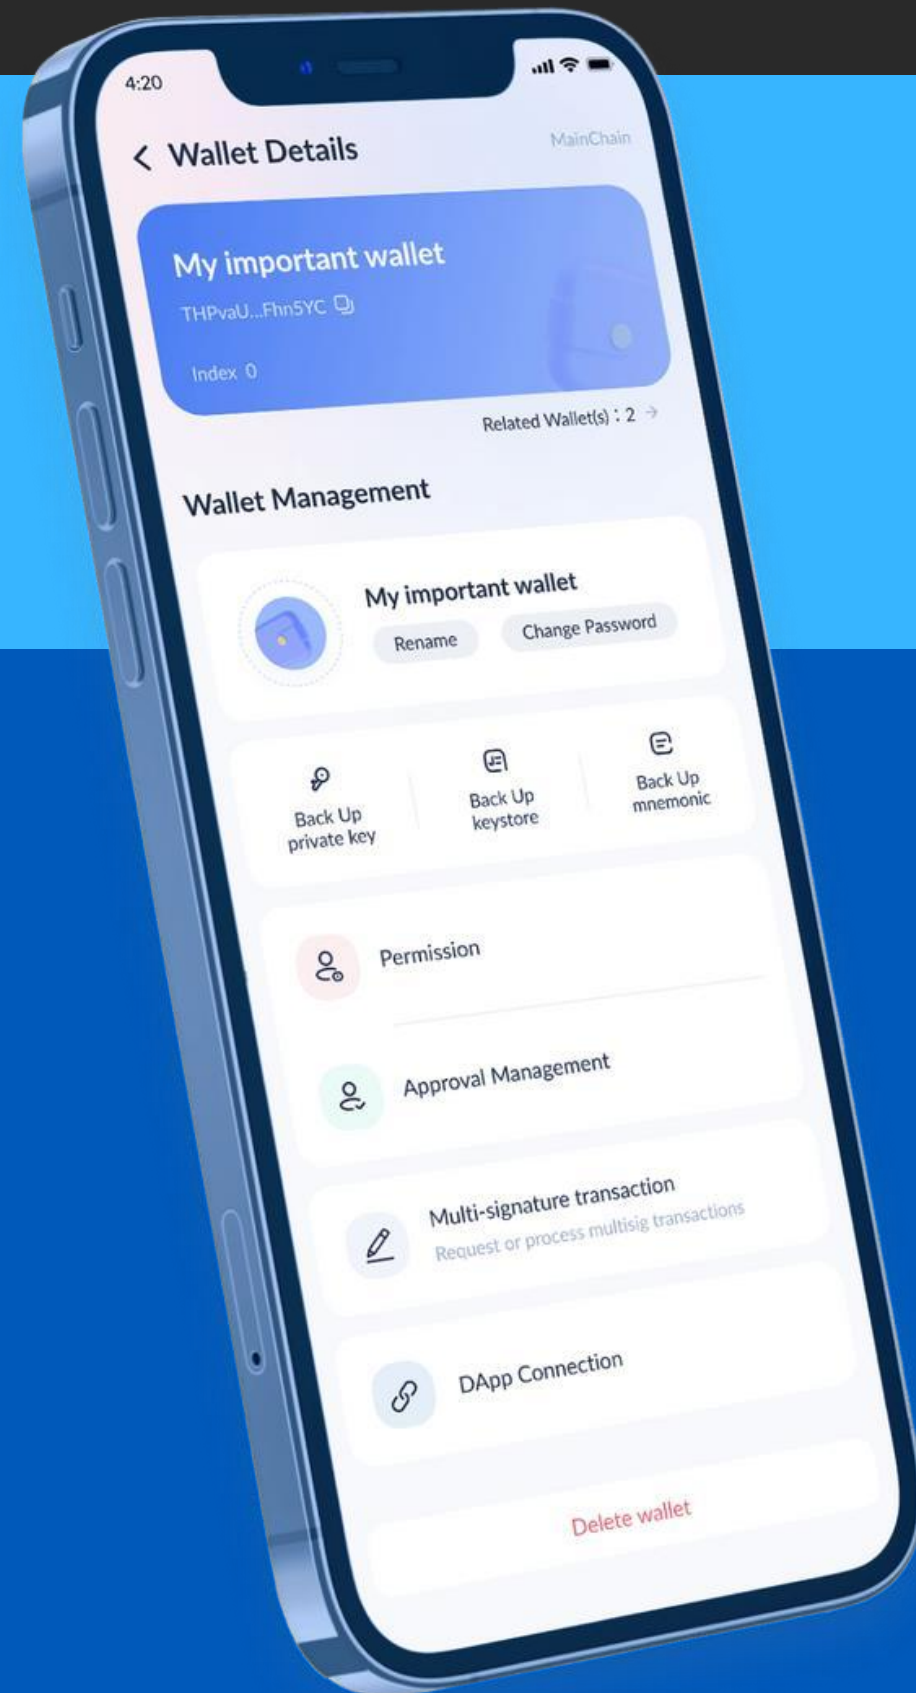

## SMART CONTRACT ?

**Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently changing the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by millions of computers around the world. This ensures that there is no risk of hacking into the smart contract and stopping the project.**

**The blockchain is an immutable record of transactions and information, which is cryptographically protected from any subsequent manipulation using thousands of independent computers worldwide**

# Tron Blockchain

**TRON is a decentralized, open-source blockchain-based operating system with smart contract functionality, proof-of-stake principles as its consensus algorithm and a cryptocurrency native to the system, known as Tronix (TRX).**
